Chiller Rental Installation, Operation, and Maintenance for Livingston Stone National Fish Hatchery; U.S. Bureau of Reclamation, Mid-Pacific Region

Montcal provided the following services: installation, operation, maintenance, and repair of a complete and functional chiller system for the period from July 1, 2022 to December 31, 2022. Chiller system performance requirements comprised supplying water at a temperature of 56°F or lower and a flow rate of 3,000 gallons per minute. Services also included monitoring, maintaining, adjusting, repairing, and modifying the system, as needed, during the operating period while providing an alarm system to alert responders when the chiller system required attention.

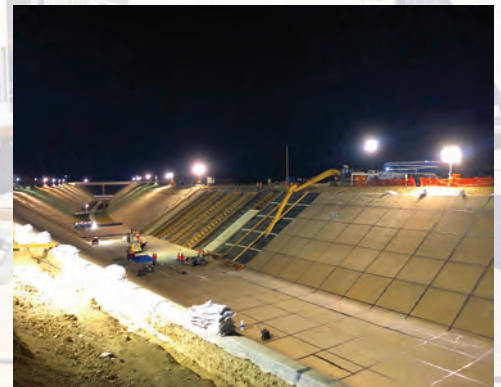

C-Canal and San Luis Canal Restoration; U.S. Fish & Wildlife Service

Rehabilitation for the C-Canal and San Luis Canal systems was necessary to ensure protection of the wildlife habitat.

The San Luis Wildlife Refuge operates an extensive canal system to manage and deliver critical water supply to the wetlands basin. Excessive vegetation and silt caused water restrictions throughout the systems that resulted in failed water control structures within each canal.

NWW Headquarters Guardrail Repair; U.S. Army Corps of Engineers, Walla Walla District

The guardrail connection repair work at the Corps' NWW Headquarters involved repairing the concrete where heaving had occurred beneath the guardrail posts located at the Mill Creek Channel and the loading dock.
