General Engineering Contractors

Providing Solutions to Difficult Projects

www.srco.com

“Providing Solutions to Difficult Projects” is the foundation of **Syblon Reid’s** culture. The founders of **Syblon Reid** established an ideology of providing innovative solutions for the safe performance of high-hazard, high-risk work at the best value to the client. Our well-trained and skilled workforce is experienced in performing projects for a wide range of public and private clients and have won numerous safety and quality performance awards.

NAICS Codes

- 562910 – Remediation Services*
- 237110 – Water and Sewer Line and Related Structures Construction
- 237120 – Oil and Gas Pipeline and Related Structures Construction
- 237310 – Highway, Street, and Bridge Construction
- 237990 – Other Heavy and Civil Engineering Construction
- 238110 – Poured Concrete Foundation and Structure Contractors
- 238120 – Structural Steel and Precast Concrete Contractors
- 238130 – Framing Contractors
- 238140 – Masonry Contractors
- 238160 – Roofing Contractors
- 238190 – Other Foundation, Structure, and Bldg Exterior Contractors
- 238210 – Elec. Contractors and Other Wiring Inst. (fire suppression)
- 238220 – Plumbing, Heating, and Air-Conditioning (fire suppression)
- 238910 – Site Preparation Contractors

*Syblon Reid is a Small Business under NAICS Code 562910

Line of Construction Services

- Environmental Remediation
- Construction/Environmental Services
- Groundwater “Pump & Treat”
- Treatment Plants
- Pump Stations
- Hydro Generation
- Water Conveyance
- Fire Alarm and Extinguishing Systems
- Vault Rehabilitation w/Advanced Composites
- Bathymetric Surveys
- Tunnels and Shafts
- Underground
- Site Preparation Work
- Bridge Work
- Emergency Response

Bonding Capacity

In excess of \$100 million.

As an award-winning General Engineering Contractor (GEC), **Syblon Reid** both self-performs and manages construction response efforts of suppliers and subcontractors. **Syblon Reid**'s extensive GEC experience includes heavy civil, mechanical, and vertical and horizontal construction in all types of terrain, such as clean construction and work in contaminated and high-hazard areas. **Syblon Reid** performs environmental remediation, groundwater remediation, and projects to treat for hexavalent chromium, arsenic, perchlorate, acid mine drainage, and high-density heavy metals sludge. Much of **Syblon Reid**'s extensive experience involves project work on water and wastewater treatment facilities, underground utilities, site preparation, hydro facilities (including dams, water conveyance systems, tunnel repairs, penstocks, valves, buildings, and structural components), bridge construction, lift stations/pumping, bank and rockfall stabilization, and fire alarm and extinguishing systems. Specialized projects comprise environmental enhancements to alleviate blocked access to fish spawning grounds and remediate habitat degradation caused by dams and culverts. Enhancements include construction of fish passages for the preservation of threatened and endangered species. **Syblon Reid applies innovative technologies, well-planned logistical approaches, and risk managed project planning that have saved lives and power utilities from shutting down services, resulting in significant cost savings for both public and private clients.**

Syblon Reid provides 24/7 emergency response services as a Prime Contractor, coordinating labor (professionals and union crafts) and mobilizing and managing heavy equipment (concrete trucks, support helicopters, rock delivery trucks, large barge assemblies with long-reach excavators, marine resources, multiple tracked drills, support vehicles, mobile laboratories, etc.) and emergency medical personnel to prevent and protect the public from imminent danger as a result of dam failures, powerhouse fires, storm damaged facilities and roads, etc.

At **Syblon Reid**, our strong Safety Culture is supported by our entire management team; and every employee understands that, not only do we care about their safety and well-being, but we all need to act in a way that promotes safety as our highest priority. This tenet is demonstrated by our excellent safety and environmental records.

Syblon Reid promotes and identifies sustainable "green" alternatives on all our projects to reduce our carbon footprint. Our Supplier Diversity Program actively solicits and promotes the increased use of businesses with M/W/DVBEs, HUBZone, SDVOSBs, and VOSBs.
